Sound Suppressed Hydraulic Breakers

Takeuchi's new sound suppressed hydraulic breakers are designed to meet the requirement for quieter operating environments. The new range offers significantly quieter breaker performance across the range.

The 6 models in the range offer excellent power to weight ratios suitable for a variety of breaker applications and Takeuchi tool carriers.

Built for the toughest construction conditions the new Takeuchi breakers offer a fully enclosed stylish body casing. Designed to offer both heavy duty protection on site, sealing against dust and debris, the casing also fully encloses the sound emissions to help minimize dBA sound levels.

SOUND & VIBRATION INSULATION

The range combines 3 parts into a one-piece arrangement - the box type outer housing offers enormous noise and vibration insulation.

FEWER COMPONENTS

The breaker body consists of far fewer integral component parts and no tie rods, an integrated accumulator and single lower tool bushing. A simplified breaker process makes for fewer component problems helping improve durability and serviceability.

POWERFUL RELIABLE AND EASY TO MAINTAIN

The design improves breaker performance by maintaining alignment for the tool. Just two moving parts minimizes maintenance issues.

Takeuchi sound suppressed breakers have a solid all round cast steel protective body eliminating exposed areas compared to conventional breakers where the tie rods are vulnerable when positioned around the edges.

The far heavier piston design provides the strength for increased blow frequency and breakout performance. Increased breaker oil flow capacity of up to 45% makes for a more versatile range of tool carriers. No need for periodic gas recharging.

EASY INSTALLATION

The larger breaker models have an easy attach pivoting connecting block for hoses - provides for varying positions of auxiliary ports of a carrier.

09/2013

Takeuchi breakers come with a 1 year warranty as standard, this does not cover wear parts and maintenance items.

In accordance with our established policy of constant improvement, we reserve the right to amend these specifications at any time without notice. Photographs shown may feature non-standard equipment.
